**HOW COAL BILLS  
CAN BE REDUCED.**

Experts of Government Have Import-  
ant Information for Public—Tests  
Made in New Haven.

(Special to The Bulletin.)  
Washington, D. C., Oct. 7.—A prob-  
lem which reaches into nearly every  
home in the United States and touch-  
es the pocketbooks of several million  
householders is discussed seriously in  
a report issued today by the bureau  
of mines, department of the interior,  
in which the experts of the bureau  
tell the public in detail just how, in  
heating their houses this coming win-  
ter, they may save in their coal bills.

The report, issued at a time when  
the cooler weather is upon the country  
and people are laying in their win-  
ter supply of coal, intimates that  
large savings can be made in nearly  
every home, and gives specific figures  
of the results obtained in one home  
in which every effort was made to  
consume the coal properly. As the re-  
port was issued solely for the bene-  
fit of householders, copies may be ob-  
tained by anyone who addresses the  
United States bureau of mines.  
The tests referred to were made in  
a ten room house in New Haven,  
which was comfortably heated at a  
cost of \$45 for the fuel and winter  
saving over other houses of the same  
size in the same locality of from \$50  
to \$100.

According to Van H. Manning, di-  
rector of the bureau of mines, similar  
results can be attained in hundreds  
of thousands of houses throughout the  
country, with a consequent saving of  
millions of dollars.  
"The report shows not only a low  
cost of heating," said Mr. Manning,  
"but also an economical use of fuel  
and illustrates what savings can be  
effected when the problem is given  
proper consideration. Systematic and  
regular handling of the fire doubtless  
had considerable to do with the re-  
sults obtained. The cost of heating  
is probably \$50 to \$100 less than what  
is expended by a large number of  
householders who live in the same lo-  
cality and have about the same heat-  
ing requirements, but use more ex-  
pensive coal and give their heating  
equipment less attention."

**VOLUNTOWN'S ANNUAL  
EXPENSES WERE \$5,543.48**  
Report by Selectmen—Town Debt In-  
creased \$1,663.06.

The selectmen of Voluntown report  
that for the past year \$5,543.48 was  
expended and the town treasurer, John  
N. Lewis, shows that the town debt  
increased \$1,663.06 in that time.  
The orders given by the selectmen  
in the year were for the following:  
Supt. of poor, \$1,197.28; registrar,  
\$25; registrar, \$49.95; state tax ac-  
count, \$428.78; sheep account, \$16; deer  
account, \$15; snow account, \$11.71;  
highway and bridge account, \$1,812.82;  
state road account, \$1,536.98; miscel-  
laneous account, \$1,124.55.

The financial status of the town for  
the year as given by the treasurer is  
the following:  
Liquidity—Town bonds, \$10,000; the  
town deposit fund, \$3,299.13; Thames  
National bank, \$2,250; Uncas National  
bank, \$2,000; total, \$17,799.13.  
Assets—Lien on the town of  
Griswold, \$74; Chelsea Savings bank,  
\$334.55; John E. Kinne, collector, levy  
1914, \$1,527.41; state debt, \$1,197.28;  
average attendance, \$1,732.22; state of  
Connecticut, on high school attend-  
ance, \$1,400; sale of Concord, on  
dog licenses (estimated), \$125; cash in  
treasury, \$518.08; balance (town's net  
debt), \$15,153.89; total, \$17,799.13. In-  
crease of town's debt during the fiscal  
year, \$1,662.06.

## "Gets-It" for Corns, SURE as Sunrise!

Any Corn, With "Gets-It" on It, is an  
Absolute "Goner."

Yes, it's the simplest thing in the  
world to get rid of a corn—when you  
use "Gets-It," the world's greatest  
corn-killer. Really, it's almost a  
pleasure to have corns just to see  
"Gets-It" Put Your Feet in Clover.

them come off with "Gets-It." It just  
loosens the corn from the true flesh,  
easily, and then makes it come "clean  
off." 48 hours ends corns for keeps.  
It makes the use of tape, corn-  
squeezing bandages, irritating salves,  
knives, scissors and razors look ridicu-  
lous. Get rid of those corns quickly,  
surely, painlessly—just easily—with  
"Gets-It." For warts and bunions,  
too. It's the 20th century way.  
"Gets-It" is sold by all druggists,  
25c a bottle, or sent direct by E.  
Lawrence & Co., Chicago.

Intelligently anticipated, as they or-  
dinarily can be, the house can be  
warmed with minimum trouble and  
fuel. When the rooms become too  
warm the fire should be checked by  
stopping the admission of air under  
the grate and decreasing the draft  
by opening the "check damper." If  
as often is done, the asphalt damper  
or the asphalt door be allowed to re-  
main open and the draft reduced by  
opening the fire door, the combustion  
of the fuel continues, although at a  
slower rate, but the cold air entering  
the fire door chills the heater so that  
little heat is realized from the coal.

To burn a pound of coal requires  
very much more than a pound of air,  
and the volume of a pound of air at  
atmospheric pressure is far greater  
than that of a pound of coal. To burn  
more coal requires more air, and this  
air must be forced into the asphalt  
and up through the fuel bed by the  
difference between the pressure of the  
hot air and gases over the fire pot  
and that of the air entering the asph-  
alt—in other words, by the draft.
